Supporting Data S1 and S2

Online Supporting Material for manuscript 1208890

Enclosed are two files for use with the tempo2 pulsar timing package that describe the pulsar ephemeris and arrival times used to derive the parameters provided in Table 1.

1208890supporting.par contains the parameters of the pulsar in tempo2 format.

1208890supporting.tim contains the arrival times in tempo2 format.

The files are ascii and can be read with any text file editor or Unix utility such as more, less or emacs or vi.

To process the data, download the two files, then use the tempo2 package in the following way from the Unix command line.

```
% tempo2 -f 1208890supporting.par 1208890supporting.tim
```
